Energy Harvesting 2018
Call for demonstrators

Wednesday 9th May 2018; Engine Shed, Station Approach
Bristol, BS1 6QH, United Kingdom

Energy Harvesting 2018 would like to **call for demonstrators** of energy harvesting devices and systems from both academia and industry.

Energy harvesting research in the UK has evolved significantly over the past decade. More and more energy harvesting technologies have already been commercialised and applied to real life applications. With the growing interests in wireless sensing and Internet of Things, there is an increasing demand for more energy harvesting research to be brought out of the lab. To respond to this call, Energy Harvesting 2018 would like to invite delegates to showcase their research and development in the following areas of energy harvesting at the event.

- Energy harvesting devices, power management circuits and systems;
- Applications: demonstration of wireless sensing or any other applications that are powered by an energy harvesting device;
- Novel concepts and approaches: new mechanisms or principles that can be experienced hands-on to better understand and appreciate them.

The registration fee is waived for academic delegates who bring demonstrators (one free registration per demonstrator), but due to the limited space, this offer is available on a first-come, first-served basis. Demonstrators from academia will be judged and a "Best Demonstrator" prize of a GBP100 Amazon voucher will be awarded at the end of the event. The exhibitor registration fee of GBP300 still applies to industrial demonstrators. All demonstrations include a short 'elevator pitch'.

To book your place for your demonstrators, please contact event@eh-network.org with a short description of your demonstrator as soon as possible.

If you have any enquiry about this call, please contact event@eh-network.org.

For more information about the event, please visit http://eh-network.org/events/eh2018.php

We look forward to seeing your demonstrators at the event!
